DETAILED OFFICE ACTION

INTRODUCTION

1. This application/control number 10/813,170 has been examined. This is the first action on the merits of the claimed invention. The application has claims 1-10 are pending.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 5-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

4. Claim s 5-8 recites the limitation "the surface opposite the heating surface of the substrate strip". There is insufficient antecedent basis for this limitation in the claim. It is unclear which surface considered opposite by applicant.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Stanfield (US5371340).

Stanfield discloses a heater (8) comprising: a heat-resistant, flexible substrate strip (12); a heating wire (40) whose periphery is covered with a heat-resistant insulative layer (34), the

heating wire being disposed on a surface of the substrate strip, the surface being defined as a heating surface; a wrap (14) comprising a heat-resistant resin sheet, wrapping the substrate strip and the heating element; a heat-conductive material (32) between the heating wire and the wrap; and a heat-insulating layer (36) between the wrap and a surface of wire (40) opposite the heating surface of the substrate strip.

7. Claims 9-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Okamoto (US5394507).

Okamoto teaches as prior art, (Figure 2a, 2b), a pipe-heating structure and a method of applying said structure comprising a tape heater (21) comprising a substrate strip (23), a heating element (22) disposed on a surface of the substrate strip, and a wrap (24) comprising a heat-resistant resin sheet, wrapping the substrate strip and the heating element; and a pipe (1) wound with the tape heater in a spiral manner.
